

2025

Sustainability Report

Company Vision

*Keeping ahead as a Global Leader in the Home Textiles segment
by adopting a sustainable approach.*

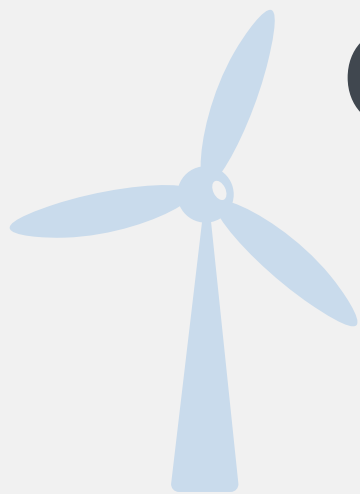

For over five generations, our company has carried a deep commitment to sustainability—not because it is a requirement of retailers or regulators, but because it is in our very DNA.

Sustainability is not a trend for us; it is the foundation of how we operate, guiding every decision we make in creating high-quality home textiles.

Our vision is clear: "Keeping ahead as a Global Leader in the Home Textiles segment, by adopting a sustainable approach." This vision reflects not only our aspirations for the future but also the legacy of responsibility and care that has defined our business for decades.

By blending traditional craftsmanship with modern sustainable practices, we continue to set benchmarks for the global home textiles industry. Our promise to future generations is to innovate responsibly—delivering comfort, quality, and beauty to homes around the world while preserving the planet we all share.

Capacity

Solar power capacity 4.35 MWp

Wind power capacity 4.6 MW

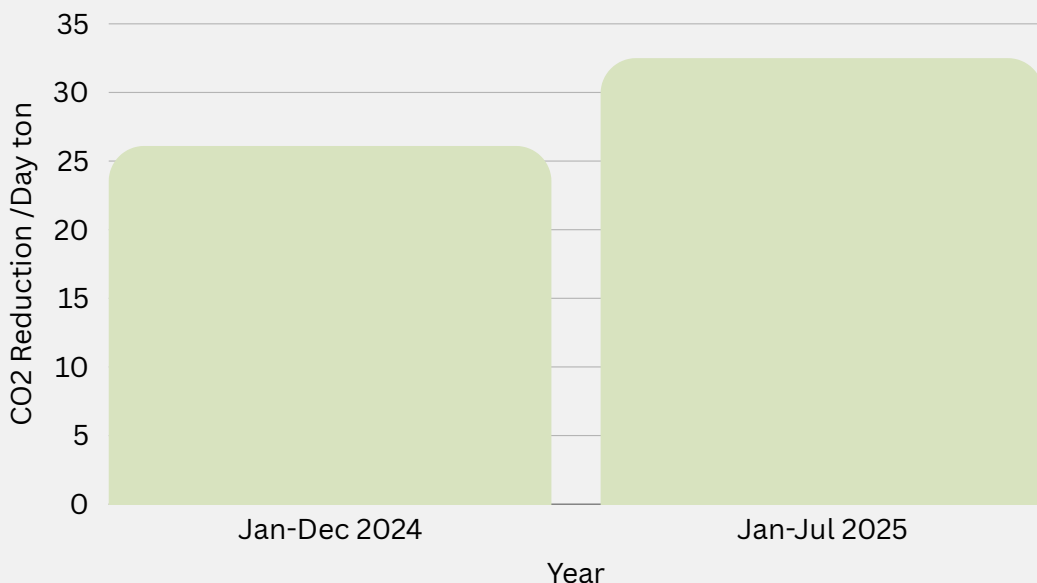

Green Energy Produced

Increased from 31,839 kWh per day in 2024 to 39,688 kWh per day in 2025

enough to charge **4,410 electric cars** or power **12,400 Indian households daily**

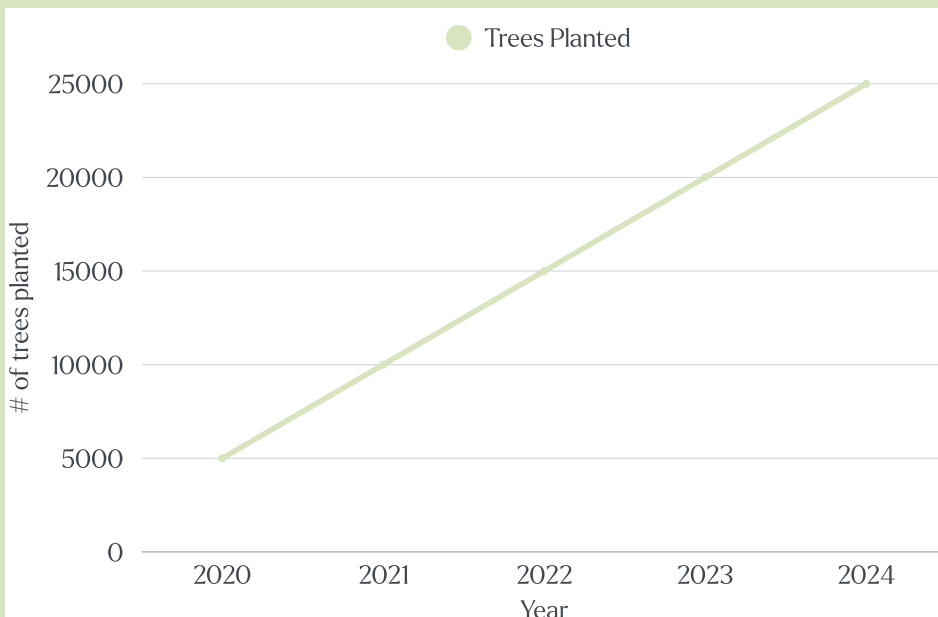

Carbon Footprint

Reducing carbon footprint by 32.5 tons/day = **removing ~2,580 cars from the road each day**

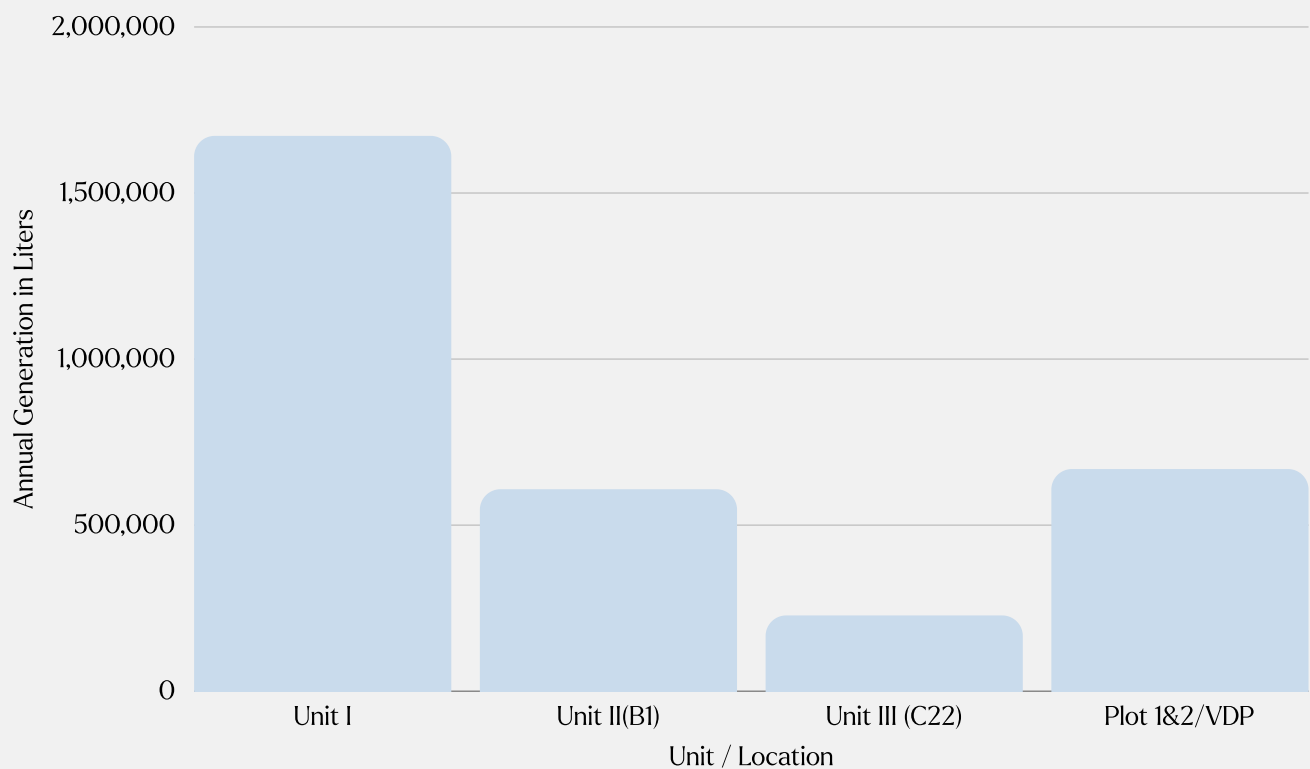

Progress Toward Tree Planting

*Planting today for a greener tomorrow. We're committed to **planting 5K trees per year** to clean our air, protect our climate, and ensure a thriving future for generations to come.*

Water Generation by Plant

20,900 bottles of
clean drinking water
produced daily

Certifications

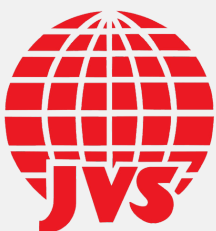

Certified ethical sourcing, fair labor practices, and globally recognized sustainability are built into everything we do. Our operations are audited for quality, safety, and environmental responsibility. When it comes to trusted suppliers, we're proud to be at the top of the list.
